SUMMER INSTITUTE Pre-Convention—Thursday, August 8, beginning at 9 am

**PAST LIFE REGRESSION** - Course #112, Tuition \$225. Participants Pre-Registered for full 3-day convention are eligible for \$175 tuition. Call 603-429-9438 to register. [www.ngh.net](http://www.ngh.net)

Past life discovery is becoming increasingly popular as a valuable tool to help people in a variety of ways. We are all constantly influenced, both negatively and positively, by past life memories hidden in our unconscious minds until something causes them to surface. This often results in a sudden and usually unexplainable reaction. At some point in their life, many people will develop a fear, phobia, or reaction to another person, or have a strong like or dislike for a certain period in history. A working knowledge of past life regression techniques will help the participant in this course uncover root causes of connections to other people, including attractions or dislikes, and the roles we play with each other in different lifetimes. You may help your clients discover and redevelop hidden talents, such as artistic, athletic or psychic. You will be able to recognize how past life influences can impact clients coming to you for a variety of issues, such as smoking cessation, weight loss, and stress control. You will learn four different types of past life regression: hypnotic regression, intuitive readings, group regressions, and conversational past life regression.

SEMINAR #11092 (50 minutes) - Friday, August 9, 9 am

**HYPNOSIS AND THE LAW OF ATTRACTION**—How to Create Powerful Manifesting Images

Some people are masters at manifesting almost anything they want, while others spend their lives experiencing one disappointment after another. There are reasons why some people are successful and others are not. This seminar shows you how to develop techniques to clearly set intentions and to create hypnotic trances to enhance the mind's images. This technique can be used for yourself or a client.

WORKSHOP #12112 (2 hours) - Friday, August 9, 11 am

**CONVERSATIONAL PAST LIFE REGRESSION**—Creating Past Life Trances While A Client Is In A Waking State

Learn to listen and observe how clients connect with past lives.

Build mind models of thought processes.

Create waking trances that examine past life influences.

Reframe negative past life influences and develop past life abilities.

This workshop is designed to help you recognize how people are constantly influenced by their past lives. You will learn to create models of your clients' thinking processes and create waking trances to help examine how to take a client back before any past life trauma and reframe negative past life influences to help enhance abilities from a past life for current use.

SEMINAR #310107 (50 minutes) - Sunday, August 11, 1 pm with ROSE NEVES-GRIGG

**THE ROLE OF HYPNOSIS IN MIRACLES**—The Importance of Positive Belief

This seminar demonstrates how the belief of an individual can play an important role in attracting desired results through the use of positive thoughts that when reinforced on a repetitive basis has the potential to produce what is often considered to be miraculous results. Rose Neves-Grigg, a member of NGH and an intuitive healer, will share the story of how her belief has propelled her to follow and fulfill her life purpose.

To register for the convention or the pre-convention workshop, email [ngh@ngh.net](mailto:ngh@ngh.net) or call 603-429-9438
